

The ATLAS RPM Difference

As a third-party processor and strategic partner, we don't just deliver software or one-time projects. We deliver ongoing partnership, increased referrals, and new business opportunities through our deep provider network. You gain a true extension of your leadership team—invested, present, and committed to your success. Ready to revitalize your independent business and dominate locally? Let's build your future together.

The ATLAS RPM Team Approach: Three Pillars of Transformation

- 1. REVENUE – Grow and Improve Your Sales Strategies
- 2. PROCESS – Enhance Efficiency and Increase Clarity
- 3. MANAGEMENT – Executive Leadership & Team Development

ATLAS RPM – Serving Independent Providers to Achieve Superior Results.

ATLAS RCM

REVENUE CYCLE MANAGEMENT

The ONLY RCM built exclusively for Complex Rehab & HME that automatically enforces every payer's unique compliance rules

Data integrity is ensured for every task performed throughout the organization, from quarterly financial reports to single outstanding receivables reports, without relying on error-prone spreadsheets.

**Get More Information
About ATLAS RCM**

The ATLAS system brings order to chaos, allowing all users, from the CEO to Accounts Payable clerks, to create, store, and use the same data derived through common processes.

The ATLAS system is designed around a standard, defined data structure (schema) that incorporates multiple common databases that store, manage, and compile information to be available for comprehensive reports.

It's impossible to ignore the impact of RCM in today's fast-moving and constantly changing HME business world. With enterprise data and processes corralled into the ATLAS system, today's DME, Respiratory, and Complex Rehab businesses can align separate departments and improve workflow, resulting in significant bottom-line savings.

ACES-ATP

CRT EVALUATION SOFTWARE

- Mobile Evaluation App - Apple and Android platform
Leverage technology for better Supplier ATP and Referring Clinician collaboration.

Each party has their own secure login and profile ensuring compliance of proper documentation.

AI Intake allows ATP to quickly upload patient demographics into assessment which populates PT/OT report.

ATPs and Clinicians each have a View-Only copy of the other's documentation.

ACES-PT/OT is designed to generate a letter style narrative report at the end of the clinician's specialty evaluation. No more after-hour documentation.

Clinician concludes with an electronic signature and report flows back to ATP.
